

# AMPLIFEYE™

Endoscopic Device | **Procedure**

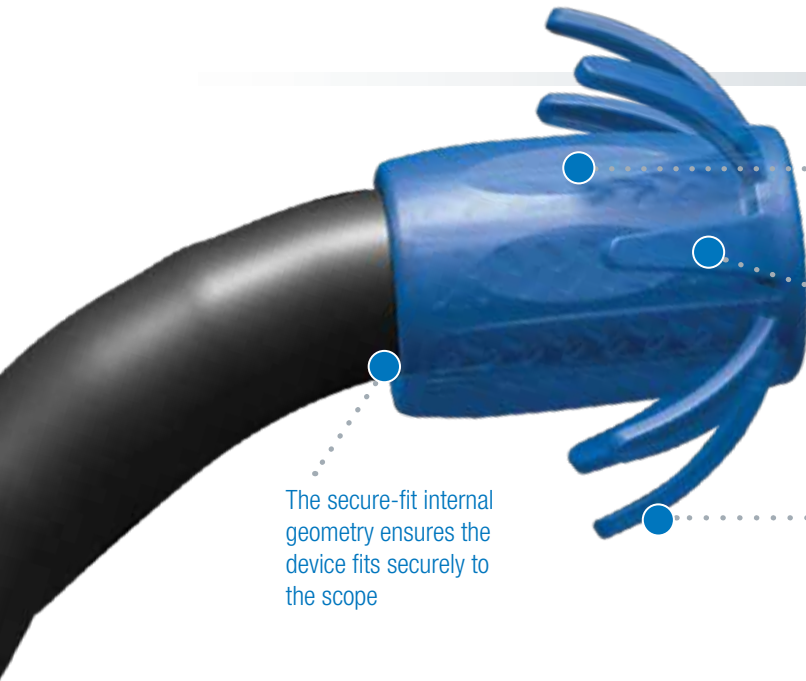

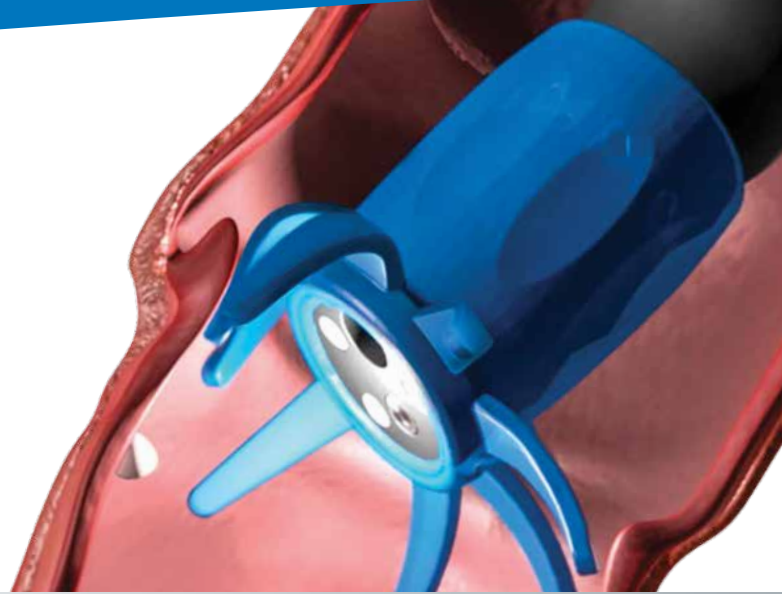

## PROCEDURE

Reducing the risk of patient cross contamination is at the forefront of infection prevention. Cantel innovates infection control products designed to improve patient outcomes, while increasing procedural efficiency.

## Arm yourself against hidden adenomas.

AmplifEYE™ Endoscopic Device is specially designed for gastroenterologists seeking the highest rate of adenomatous polyp detection. Flexible detection arms separate the folds, bringing polyps into view.

Unique material formulation creates a smooth surface for easy scope advancement without bunching or dragging of the lumen wall

Single row of detection arms allow for better scope stability for efficient and effective tissue resection

Flexible detection arms separate the folds – bringing adenomatous polyps into view

The secure-fit internal geometry ensures the device fits securely to the scope
